Administrative Support

Supporting modules like Human Resource Management, Attendance Management, Payroll, Stores and Inventory, Fixed Asset can be added as per the requirements and need of the Hospital

Human Resource Management

In any organization Human Resource acts as a foundation in the organizational growth as well as in business enhancements. In Hospital business, element of human force gains special importance. Keeping this vitality into the consideration we have designed an employee centric HR Management. HR Management module covers day to day activities and tasks pertaining to existing employees, new hires and also contractual employees. Employee data is created covering comprehensive details of each employee such as:

- Personal Information
- General Information
- Salary Structure
- Reference

- Experience
- Any other detail as per client requirement.

Attendance Management

It include employee schedule supports tracking the duty timings, man hours over various activities and much more. Attendance system support both manual attendance & attendance through biometric devices (Finger print as well as facial attendance option). Its features include:

- **Developing Multiple shifts** can be created using shift roster, which will define the working days and time slot for each employee or department
- **Over time calculations** are also incorporated in monthly salary calculation

Payroll Management

Attendance Adjustment & Generation of Salary sheet: Auto as well as manual attendance adjustment. Automatic upload of employee attendance in payroll system and generation of salary sheet based on the time and attendance data. Adjustments possible in all segments that effect the overall salary of an individual

Inventory Management

Store Management

Fixed Store Management

Accounts & Book Keeping

It is cost effective once these activities are automated and management can monitor hospital operations and patient movement within OPD and various hospital facilities; All hospital activities are integrated with the accounts section, as soon as an order is booked, the relevant sections in the books of account will be updated in real time, such as revenue, cash in hand, etc.

- **Billing & Report Module:** The crucial thing in hospital is billing, as the data is centralized the billing is taken care with the patient MRN. The Reports are available in detail and stored in a centralized server for the patient to download it with proper credentials. It counts the single penny spent by the patient right from the entry point. The payment details of the patient with can be viewed any time at Patient Account Status which shows the total records till the date. The company sponsorship norms or other medical reimbursement facilities provided to the patient can be recorded in this module.
- **Account Management Module:** Accounts management module is all about managing book keeping of the hospital.
- **Financial Management Module:** Financial Management module provides financial management over the entire hospital operation, also provides overall profit and loss details. This module controls and effectively manages the entire monetary flow, providing transparency and accountability which takes your business to the path of growth.
